***NOTE: There are 9 islands (or island groups) that are independent countries (in capital letters); those are the most important. The rest are territories that belong to other countries; they are important tourist destinations! All are listed for you above in order from north to south, as much as possible. Learn where they are and which is which! On the test, the countries that own the territories will be extra credit.

Complete the take-home test and turn in next week.
